Rehabilitation Foundation for Disabled Persons Inc., U.S.

Rehabilitation Foundation for Disabled Persons Inc., U.S. (RFDP US) received a gift of \$5,000 (U.S. funds) from an American donor who supports the mission of Ontario March of Dimes and its subsidiary. The donation has been set aside by Ontario March of Dimes with an invitation to RFDP US to prepare a proposal as to how these funds could be expended to build awareness, resources and support for some activity in the United States. It is felt that support could be given to survivors of polio reflecting the original mandate of the Canadian organization and its original relationship with March of Dimes U.S.A.

The corporation has been in discussions with Post Polio Health International (PPHI) which operates out of St. Louis, Missouri with regard to their participation in some joint activity, whether represented on the Board of this American corporation, or in partnership for an international activity such as the Festival of International Conferences on Caregiving, Disability, Aging & Technology (FICCDAT) 2011.

This non-profit charitable organization is registered in the State of Florida, U.S.A.

There were no programs or financial transactions beyond this report during fiscal year 2009-2010.
